

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

- Trade name: **DERSOLV**
- Substance name: hydrocarbons, terpene processing by-products
- CAS number: 68956-56-9
- EINECS number: 273-309-3
- REACH Registration number: 01-2119980606-28-0000

1.2 Relevant identified uses of the substance or mixture and uses advised against

Relevant identified uses: production and distribution of the substance, intermediate for synthesis, industrial formulation, fragrance substance, solvent, formulation and use of cleaning products, flotation agents, paints, coatings, strippers, inks, adhesives, sealants, lubricants, metal working fluids/rolling oils, rubber and agrochemicals, de-icing and anti-icing agents, fuels, blowing agents, functional fluids, polymer processing, binders and release agents, oil and gas field drilling and production operations, agents for road and construction operations, polishes and wax blends.

1.3 Details of the supplier of the safety data sheet

Manufacturer/Supplier:

LES DERIVES RESINIQUES & TERPENIQUES (DRT)
30 rue Gambetta
BP 90206
40105 DAX CEDEX
FRANCE
Tel: 33-(0)5 58 56 62 00
Fax: 33-(0)5 58 56 62 40
Email: fds@drt.fr

1.4 Emergency telephone numbers

NCEC (24/24 – 7/7)
Europe: +44 1235 239670
Global / English speaking countries: +44 1865 407333
Other countries: see section 16

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Classification according to Regulation (EC) No 1272/2008:

GHS02 flame

Flam. Liq. 3 H226 Flammable liquid and vapour.

GHS08 health hazard

Asp. Tox. 1 H304 May be fatal if swallowed and enters airways.

GHS09 environment

Aquatic Chronic 2 H411 Toxic to aquatic life with long lasting effects.

GHS07 exclamation mark

Skin Irrit. 2 H315 Causes skin irritation.

Eye Irrit. 2 H319 Causes serious eye irritation.

Skin Sens. 1B H317 May cause an allergic skin reaction.

(contd. on page 2)

DE

Safety data sheet

according to Article 31 of Regulation No 1907/2006/EC (REACH)

Printing date: 04.01.2023

Version number: 14.0

Revision date: 04.01.2023

Trade name: DERSOLV

(contd. of page 1)

Information concerning particular hazards for human and environment:

Effects on human health:

if swallowed accidentally, the product may enter the lungs due to its low viscosity and lead to the rapid development of very serious pulmonary lesions (medical survey for 48 hours minimum).

2.2 Label elements**Labelling according to Regulation (EC) No 1272/2008:**

The substance is classified and labelled according to the CLP regulation.

Hazard pictograms:

GHS02 GHS07 GHS08 GHS09

Signal word: Danger**Hazard statements:**

H226 Flammable liquid and vapour.

H315 Causes skin irritation.

H319 Causes serious eye irritation.

H317 May cause an allergic skin reaction.

H304 May be fatal if swallowed and enters airways.

H411 Toxic to aquatic life with long lasting effects.

Precautionary statements:

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection/hearing protection.

P301+P310 IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician.

P331 Do NOT induce vomiting.

P302+P352 IF ON SKIN: Wash with plenty of soap and water.

P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P337+P313 If eye irritation persists: Get medical advice/attention.

P501 Dispose of contents and container in accordance with local/regional/national/international regulations.

Additional information: The product contains dipentene (CAS 138-86-3).**2.3 Other hazards****Results of PBT and vPvB assessment****PBT:**

According to Annex XIII of REACH Regulation, the substance is not considered to be Persistent, Bioaccumulative and Toxic.

vPvB:

According to Annex XIII of REACH Regulation, the substance is not considered to be very Persistent and very Bioaccumulative.

Determination of endocrine-disrupting properties

The substance is not included in the list established in accordance with Article 59(1) of REACH regulation for having endocrine disrupting properties, and is not a substance identified as having endocrine disrupting properties in accordance with the criteria set out in Commission Delegated Regulation (EU) 2017/210056 or Commission Regulation (EU) 2018/605.

SECTION 3: Composition/information on ingredients

3.1 Substances

UVCB (substance of unknown or variable composition, complex reaction products or biological materials)

Identification number(s)

CAS number: 68956-56-9

EINECS number: 273-309-3

(contd. on page 3)

DE

Safety data sheet

according to Article 31 of Regulation No 1907/2006/EC (REACH)

Printing date: 04.01.2023

Version number: 14.0

Revision date: 04.01.2023

Trade name: DERSOLV

(contd. of page 2)

Description:

This is a distillation fraction obtained from terpene processing, mainly composed of hydrocarbons (terpinolene, camphene, alpha-terpinene, alpha-pinene, dipentene, gamma-terpinene, paracymene, isoterpinolene,...) ; cineols (1,4-cineole and 1,8-cineole) and terpene alcohols (alpha-terpineol, gamma-terpineol,...) are also present.

SECTION 4: First aid measures**4.1 Description of first aid measures****After inhalation:**

Supply fresh air. If symptoms are experienced, get medical attention.
In case of unconsciousness place patient stably in side position for transportation.

After skin contact:

Immediately rinse with plenty of water.
Remove contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse.
Get medical attention if irritation or skin rash occurs.

After eye contact:

Immediately rinse with plenty of water. Remove contact lenses, if present and easy to do. Hold eyelids apart and flush eyes with plenty of cool low-pressure water for 15 minutes. Consult an ophthalmologist.

After swallowing:

Do NOT induce vomiting.
If the person is conscious, rinse out mouth with water.
Call for a doctor immediately.

4.2 Most important symptoms and effects, both acute and delayed Pulmonary effects if swallowed accidentally.**4.3 Indication of any immediate medical attention and special treatment needed**

If swallowed accidentally, medical survey for 48 hours minimum.

SECTION 5: Firefighting measures**5.1 Suitable extinguishing agents**

Foam
Fire-extinguishing powder
Carbon dioxide (CO₂)

5.2 Special hazards arising from the substance or mixture In case of fire, may release irritant and toxic fumes.**5.3 Advice for firefighters****Protective equipment:**

Firefighters should wear appropriate protective equipment and self-contained breathing apparatus.

Additional information: Cool endangered receptacles with water spray.**SECTION 6: Accidental release measures****6.1 Personal precautions, protective equipment and emergency procedures**

Wear appropriate personal protective equipment. Keep unprotected persons away.
Provide adequate ventilation.
Keep away from sources of ignition.

6.2 Environmental precautions

Do not allow product to reach soil, waterways, drains and sewers.
Inform the relevant authorities if the product has caused environmental pollution (soil, waterways, drains or sewers).

6.3 Methods and material for containment and cleaning up

Small spills:

Absorb spilled liquid with inert absorbent. Collect in an appropriate container properly labelled. Close it for disposal.

Large spills:

Stop spill if it can be done without danger. Dike. Pump as much liquid as possible with an explosion-proof pump or a hand pump. Absorb the remaining liquid with inert absorbent. Collect in an appropriate container properly labelled. Close it for disposal. Use only non-sparking tools.

(contd. of page 3)

6.4 Reference to other sections

See Section 8 for information on personal protection equipment.
See Section 13 for disposal information.

SECTION 7: Handling and storage**7.1 Precautions for safe handling**

Wear appropriate personal protective equipment. Provide adequate ventilation in the workplace.

Information about fire - and explosion protection:

Protect against electrostatic charges.

Use only non-sparking tools.

Keep ignition sources away.

Protect from heat.

7.2 Conditions for safe storage

If possible, store the drums or ecobulk under shelter in a cool and well ventilated place.

Keep container type drums or ecobulk tightly closed.

All equipments including ventilation systems must be equipotential and earthed.

Keep away from sources of ignition.

Protect drums or ecobulk from high heat and direct sunlight.

7.3 Specific end use(s) Only identified uses listed in section 1 are covered by exposure scenarios.**SECTION 8: Exposure controls/personal protection****8.1 Control parameters****Components with limit values that require monitoring at the workplace:**

terpenes

Austria: limit value - 8 hours = 560 mg/m³ (100 ppm)

Austria: limit value - short term = 560 mg/m³ (100 ppm)

Denmark: limit value - 8 hours = 25 ppm

This sheet is based on the current valid lists for occupational exposure limit values at the time of its preparation. The DNELs and PNECs values are derived from the chemical safety assessment conducted for REACH.

Occupational exposure limits and DNELs are health-based but they are not necessarily set in the same way. The primary duty is to comply with risk management measures which enable to limit exposures as much as possible and to be in line with exposure reference levels.

· 8.2 Exposure controls**· General protective and hygienic measures:**

The usual precautionary measures are to be adhered to when handling chemicals. Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure.

Immediately remove all soiled and contaminated clothing.

Avoid contact with eyes and skin.

· Personal protective equipment**· Respiratory protection:**

If ventilation is insufficient, use a breathing apparatus (filtering device with type A cartridge or insulating device with a source of fresh air independent of the ambient air).

· Hand protection

Protective gloves resistant to chemicals (standard EN 374-1). They should be replaced regularly and if there is any indication of degradation.

· Eye/face protection

Safety glasses (standard EN 166).

For qualifying operations with increased risk (eg: connection/disconnection of hoses, purges, sampling, etc.) wear safety glasses (standard EN 166) AND a face shield.

· Body protection: Protective work clothing.

SECTION 9: Physical and chemical properties

· **9.1 Information on basic physical and chemical properties**

· **General Information**

· **Appearance:**

· **Physical state:**

Liquid

· **Colour:**

Colourless - slightly yellow

· **Odour:**

Pine

· **Odour threshold:**

Not determined

· **Change in condition**

· **Melting/freezing point:**

< -80°C [OECD 102 / Regulation (EC) No. 440/2008 / EU A1 test]

· **Boiling point or boiling range:**

173°C [OECD 103 / Regulation (EC) No. 440/2008 / EU A2 test / Siwoloboff method]

· **Flammability:**

The substance is ignitable

· **Lower and upper explosion limits**

· **Lower:**

No data available

· **Upper:**

No data available

· **Flash point:**

44°C [Regulation (EC) No. 440/2008 / EU A9 test / equilibrium method - closed cup]

· **Auto-ignition temperature:**

233°C [Regulation (EC) No. 440/2008 / EU A15 test / spontaneous inflammation temperature of liquids and gases]

· **Decomposition temperature:**

Not determined

· **pH value:**

Not applicable

· **Viscosity**

· **Kinematic viscosity:**

< 7 mm²/s [OECD 114 / capillary rotational viscometer method]

· **Dynamic viscosity:**

1,25 - 2,61 mPa.s (20°C) [OECD 114 / forced ball viscometer method (dynamic)]
0,93 - 1,65 mPa.s (40°C) [OECD 114 / forced ball viscometer method (dynamic)]

· **Solubility**

· **in water:**

Values based on water solubility of alpha-pinene:
2,75 mg/L (20°C) [OECD 105 and 123 / slow-stirring method - columnelution method]

· **Partition coefficient (n-octanol/water):**

Values based on log Kow of alpha-pinene:
log Kow = 4,46 (20°C) [OECD 117 / HPLC method]

· **Vapour pressure:**

Values based on vapour pressure of alpha-pinene:
690 Pa (20°C) [OECD 104 / Regulation (EC) No. 440/2008 / EU A4 test / static method]

· **Density and/or relative density**

· **Relative density:**

0,875 - 0,892 (20°C) [OECD 109 / Regulation (EC) No. 440/2008 / EU A3 test / oscillating densitometer]

· **Vapour density:**

Not determined

· **Explosive properties:**

The components of the substance do not contain any chemical groups associated with explosive properties

· **Oxidising properties:**

The components of the substance do not contain any chemical groups associated with explosive properties

· **9.2 Other information**

No other data

SECTION 10: Stability and reactivity

· **10.1 Reactivity** No data from specific reactivity tests are available for this product or this class of product.

· **10.2 Chemical stability**

Product stable under storage and handling conditions according to specifications (see section 7).

· **10.3 Possibility of hazardous reactions**

No hazardous reactions known except those with incompatible products listed in point 10.5.

(contd. on page 7)

DE

Safety data sheet

according to Article 31 of Regulation No 1907/2006/EC (REACH)

Printing date: 04.01.2023

Version number: 14.0

Revision date: 04.01.2023

Trade name: DERSOLV

(contd. of page 6)

- **10.4 Conditions to avoid** Keep away from any flame or source of sparks.
- **10.5 Incompatible materials** Oxidizing agents, strong acids and strong bases.
- **10.6 Hazardous decomposition products** No dangerous decomposition products known.

SECTION 11: Toxicological information

- **11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008**
- **Acute toxicity** Based on available data, the classification criteria are not met.

- **LD₅₀/LC₅₀ values relevant for classification:**

Oral	LD ₅₀	> 2 000 mg/kg (rat) (OECD 401)
Dermal	LD ₅₀	> 2 000 mg/kg (rat) (OECD 402)

- **Skin corrosion/irritation:**

The substance was found skin irritant (category 2) in a skin irritation study conducted on rabbit according to a method similar to OECD 404 Guideline.

- **Serious eye damage/irritation:**

The substance is classified as eye irritant (category 2) based on available data on one of its constituent and on another substance containing common constituents:

- camphene induced irritant effects in an eye irritation study conducted on rabbit, according to OECD 405 Guideline;
- a substance containing terpinolene, 1,4-cineole, 1,8-cineole and dipentene was found irritant in an *in vitro* eye irritation study on a human reconstructed corneal epithelium model.

- **Skin sensitisation:**

The substance is classified as skin sensitiser (category 1B) based on available data on one of its constituent and on another substance containing common constituents: skin sensitisation effects were observed in the murine Local Lymph Node Assay (LLNA - OECD 429 Guideline) conducted with terpinolene and with a substance containing terpinolene, 1,4-cineole, 1,8-cineole and dipentene.

- **Mutagenicity/genotoxicity:**

Results of tests conducted with the substance showed that it has no genotoxic potential:

- the substance was not mutagenic in bacteria in an Ames test (OECD 471 Guideline);
- the substance was not mutagenic in a gene mutation test in mouse lymphoma L5178Y cells (OECD 476 Guideline);
- no genotoxic effects were observed in a chromosome aberration test in human lymphocytes (OECD 473 Guideline), except after exposing cells for 20 hours without metabolic activation S9. The toxicological significance of this observation was considered questionable. Therefore, an *in vitro* micronucleus test (OECD 487 Guideline) was performed under similar experimental conditions (20h-exposure without metabolic activation, human lymphocytes). No biologically relevant increases in micronuclei were observed.

- **Carcinogenicity:**

The substance is not expected to be carcinogenic: no mutagenic effects were observed with the substance itself and a repeated dose toxicity study conducted on rats with another substance containing terpinolene, 1,4-cineole, 1,8-cineole and dipentene did not demonstrate any hyperplasia signs or pre-neoplastic lesions.

- **Reproductive toxicity:**

Data are available on two constituents of the substance (alpha-pinene and camphene) and on another substance containing common constituents (terpinolene, 1,4-cineole, 1,8-cineole and dipentene). Based on this information, no toxic effects for reproduction are expected from the substance itself:

- a combined repeated dose and reproduction/developmental screening test was conducted on rat by oral route, according to OECD 422 Guideline, with a substance containing terpinolene, 1,4-cineole, 1,8-cineole and dipentene. No effects were observed on reproductive performance, gestation parameters, pup survival and development; NOAEL (No Observed Adverse Effect Level) - systemic toxicity for males and females (P) = 435.8 mg/kg body weight/day (higher dose tested)
- NOAEL - reproduction and developmental toxicity = 435.8 mg/kg body weight/day (higher dose tested)
- no effects were observed on reproductive organs, in 90-day inhalation repeated toxicity studies conducted with alpha-pinene on rats and mice;
- no effects on development were observed at maternal non-toxic doses, in an oral study conducted on rat with camphene (according to OECD 414 Guideline).

- **Specific target organ toxicity - single exposure:**

No specific target organ toxicity was observed in the LD₅₀ determination studies.

(contd. on page 8)

DE

Safety data sheet according to Article 31 of Regulation No 1907/2006/EC (REACH)

Printing date: 04.01.2023

Version number: 14.0

Revision date: 04.01.2023

Trade name: DERSOLV

(contd. of page 7)

Specific target organ toxicity - repeated exposure:

Data are available on two constituents of the substance (alpha-pinene and camphene) and on another substance containing common constituents (terpinolene, 1,4-cineole, 1,8-cineole and dipentene). Based on this information, no classification is needed for the substance:

- a combined repeated dose and reproduction/developmental screening test was conducted on rat, according to OECD 422 Guideline, with a substance containing terpinolene, 1,4-cineole, 1,8-cineole and dipentene. Daily administration of the substance by diet for 42 days, at dose levels up to 435.8 mg/kg body weight/day, was well tolerated. Effects only considered as adaptative or specific for male rats were observed;

NOAEL = 435.8 mg/kg body weight/day (maximal tested dose)

- a 90-day repeated dose toxicity study was conducted by inhalation with alpha-pinene;

NOAEC (mice): 283.24 mg/m³ - based on moderated hyperplasia of the transitional epithelium of the urinary bladder -

a 28-day repeated dose toxicity study was conducted on rats, according to OECD 407 Guideline with camphene.

Daily administration of the substance by gavage, at dose levels up to 1 000 mg/kg body weight/day was generally well tolerated.

NOAEL = 250 mg/kg body weight/day - based on absolute and relative weights increase

- **Aspiration hazard:** If swallowed accidentally, the product may enter the respiratory tract due to its low viscosity.

Additional toxicological information:**CMR effects (carcinogenicity, mutagenicity and toxicity for reproduction):**

According to Regulation (EC) No 1272/2008, the substance is not considered to be CMR.

11.2 Information on other hazards**Endocrine disrupting properties**

The substance is not included in the list established in accordance with Article 59(1) of REACH regulation for having endocrine disrupting properties, and is not a substance identified as having endocrine disrupting properties in accordance with the criteria set out in Commission Delegated Regulation (EU) 2017/210056 or Commission Regulation (EU) 2018/605.

SECTION 12: Ecological information

12.1 Aquatic toxicity

Reliable short-term aquatic toxicity values have been determined in tests conducted with water-accommodated fractions (WAFs). This method was developed for slightly soluble substances; the initial loading rate of the substance is well higher than the solubility in water. LL₅₀ and EL₅₀, similar to LC₅₀ and EC₅₀, are obtained.

LL₅₀ (96 h), fish (Danio rerio): 5.07 mg/L (nominal concentration - OECD 203 Guideline)

EL₅₀ (48 h), daphnia (Daphnia magna): 2.10 and 2.70 mg/L (nominal concentration - OECD 202 Guideline - two batches tested)

EL₅₀ (72 h), algae (Pseudokirchnerella subcapitata): 4.78 mg/L (based on growth rate - nominal concentration - OECD 201 Guideline)

EL₅₀ (72 h), algae (Pseudokirchnerella subcapitata): 3.08 mg/L (based on yield - nominal concentration - OECD 201 Guideline)

These results lead to classify the substance for its toxicity to aquatic life (hazard to the aquatic environment - category 2).

Toxicity to aquatic microorganisms:

Sewage containing the substance can thus be treated by a municipal sewage treatment plant (taking into account the PNEC sewage treatment plant given in section 8).

An acute aquatic toxicity study was performed according to OECD 209 Guideline to assess the effects of two different batches of the substance. The microbial source was an activated sludge of a predominantly domestic sewage.

EC₅₀ (3 h), bacteria (activated sludge of a predominantly domestic sewage): 365 and 579 mg/L (respiration rate - nominal concentration - two batches tested - OECD 209 Guideline)

12.2 Persistence and degradability

The substance is readily biodegradable.

Degradation after 28 days: 81 - 83% (oxygen consumption - OECD 301 D Guideline - activated sludge of a domestic sewage, non-adapted).

12.3 Bioaccumulative potential

No measured data are available for the individual constituents of the substance. Based on partition coefficients octanol/ water determined for the main constituents, an accumulation in organisms is not expected.

12.4 Mobility in soil No experimental data available.

(contd. on page 9)

· Danger code:	30
· EMS Number:	F-E,S-D
· 14.7 Maritime transport in bulk according to IMO instruments	Not applicable
· Transport/Additional information:	
· ADR	
· Tunnel restriction code	D/E
· Classification code (letter/figure)	F1
· UN "Model Regulation"	UN 2319, TERPENE HYDROCARBONS, N.O.S. (hydrocarbons, terpene processing by-products), ENVIRONMENTALLY HAZARDOUS, 3, III

SECTION 15: Regulatory information

· **15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture**

Regulation (EC) No 1907/2006 (REACH):

The product does not contain any of the substances included in the following lists

- Annex XIV (authorisation) / substances of very high concern (SVHC)

- Annex XVII (restrictions)

Directive 2012/18/EU:

Product fulfilling the criteria of hazard categories:

- P5c "Flammable liquids, category 3 (H226)",

- E2 "Hazardous to the Aquatic Environment in Category Chronic 2 (H411)".

· **15.2 Chemical safety assessment** A Chemical Safety Assessment has been carried out.

SECTION 16: Other information

Information provided in this safety data sheet is based on our experience and present knowledge. It is a description of safety requirements and data given on the product and cannot be considered as specifications. They shall not constitute a guarantee for any specific product features and shall not establish a legally valid contractual relationship.

· Full text of H and EUH mentions indicated in sections 2 and 3:

H226: Flammable liquid and vapour
H304: May be fatal if swallowed and enters airways
H315: Causes skin irritation
H317: May cause an allergic skin reaction
H319: Causes serious eye irritation
H411: Toxic to aquatic life with long lasting effects

· Abbreviations and acronyms:

CLP: Regulation (EC) No 1272/2008 on Classification, Labelling and Packaging
LD₅₀: Lethal dose for 50% of animals exposed by oral or dermal route
EC₅₀: Concentration which leads to a 50% reduction in treated organism responses compared to untreated organism responses (algae) or concentration which causes effects to 50% of the tested organisms (daphnids)
LC₅₀: Lethal concentration for 50% of exposed animals
EL₅₀: Loading rate which leads to a 50 % reduction in treated organisms responses compared to untreated organism responses (algae) or loading rate which causes effects to 50 % of the tested organisms (daphnids)
LL₅₀: Median lethal loading rate (lethal level for 50% of fish exposed)
LLNA: Local Lymph Node Assay
NOAEC: No Observed Adverse Effect Concentration
NOAEL: No Observed Adverse Effect Level
OECD: Guidelines from the Organisation for Economic Co-operation and Development
SVHC: Substances of Very High Concern
PBT: Persistent, Bioaccumulative and Toxic substance
vPvB: very Persistent and very Bioaccumulative substance
Flam. Liq. 3: Flammable liquids, Category 3
Skin Irrit. 2: Skin corrosion/irritation, Category 2
Eye Irrit. 2: Serious eye damage/eye irritation – Category 2
Skin Sens. 1B: Skin sensitisation, Category 1B
Asp. Tox. 1: Aspiration hazard, Category 1
Aquatic Chronic 2: Hazardous to the aquatic environment - long-term aquatic hazard – Category 2
