| <b>Microbiological data</b>                   | This refined oil is deodorized (180 - 205°C) during the refining process, effectively eliminating microbiological activity. The water content (typically less than 0.5%) is low and provides an environment that is not suitable for microorganisms. Therefore, this product is not an environment conducive to microbiological development<br>Total aerobic: < 1000 cfu/g<br>Absence of pathogenic germs in 1 g |                                                                           |
